C125(Part 1)

## SCHEDULE 3 TO CLAUSE 32.07 RESIDENTIAL GROWTH ZONE

Shown on the planning scheme map as **RGZ3**.

### CLAYTON MAJOR ACTIVITY CENTRE AND MONASH NATIONAL EMPLOYMENT AND INNOVATION CLUSTER

#### 1.0 Design objectives

19/04/2018  
C125(Part 1)

To facilitate housing growth in the form of apartment developments of a high quality design and finish.

To ensure developments are constructed within an open garden setting through the retention and planting of vegetation, including canopy trees.

To ensure that the height, scale and form of development respects any sensitive residential interfaces and minimises the appearance of visual bulk.

#### 2.0 Requirements of Clause 54 and Clause 55

19/04/2018  
C125(Part 1)

	Standard	Requirement
<b>Minimum street setback</b>	A3 and B6	Minimum setback from front street – 4 metres. Where a development is located on a corner site the setback to the side street is the same distance as the setback of the front wall of any existing building on the abutting allotment facing the side street or 3 metres, whichever is the lesser.
<b>Site coverage</b>	A5 and B8	None specified
<b>Permeability</b>	A6 and B9	None specified
<b>Landscaping</b>	B13	Retain or provide at least one canopy tree with a minimum mature height equal to the height of the roof of the proposed building or 10 metres, whichever is greater.
<b>Side and rear setbacks</b>	A10 and B17	Side setbacks – 1 metre, plus 0.3 metres for every metre of height over 3.6 metres up to 6.9 metres, plus 1 metre for every metre of height over 6.9 metres. Rear setback – 3 metres for the first 2 storeys plus 2 metres for the third storey.
<b>Walls on boundaries</b>	A11 and B18	None specified
<b>Private open space</b>	A17	An area of 40 square metres, with one part of the private open space at the side or the rear of the dwelling with a minimum area of 35 square metres, a minimum width of 3 metres and convenient access from a living room.
	B28	An area of 40 square metres, with one part of the private open space at the side or the rear of the dwelling or residential building with a minimum area of 35 square metres, a minimum width of 3 metres and convenient access from a living room.
<b>Front fence height</b>	A20 and B32	0.9 metres

#### 3.0 Maximum building height requirement for a dwelling or residential building

19/04/2018  
C125(Part 1)

None specified.

## 4.0 Application requirements

19/04/2018  
C125(Part 1)

An application must be accompanied by the following information, as appropriate:

- A landscape plan prepared by a landscape architect or a suitably qualified landscape designer, drawn to scale and dimensioned which:
  - Identifies, retains and protects significant vegetation on the site and significant vegetation on adjoining properties in proximity to the development which contributes to the character of the area, including the identification of tree protection zones.
  - Proposes new canopy trees and other vegetation that will enhance the landscape character of the neighbourhood particularly within the front, side and rear setbacks, along driveways and walkways, and within private open space areas.
  - Provides a schedule of all proposed trees, shrubs and ground covers including the size of all plants (at planting and at maturity), their location, botanical names and the location of all areas to be covered by grass, lawn, mulch or other surface material.
  - Provides the location and details of all fencing and external lighting.
  - Identifies the extent of any cut and fill, embankments or retaining walls associated with the landscape treatment of the site.
  - Details of all proposed surface materials including pathways, patios or decked areas and measures to reduce stormwater runoff such as porous paving, swales and infiltration, ponding areas and grey water reuse.
- A schedule of materials and finishes to be used in the development.
- A plan identifying service areas, such as waste and recycling areas, utilities and services.
- A waste management plan for the collection and disposal of garbage and recyclables for all users on the site which details:
  - The method of collection of garbage and recyclables including the need to provide for private services or utilisation of Council services.
  - On-site bin storage areas and structures.
  - Appropriate bin storage on collection days that ensures the nature strip in front of the site is sufficient to support the number of bins required.
- Measures to minimise the impact upon local amenity and the operation, management, amenity and maintenance of car parking areas, walkways and communal open space.

## 5.0 Decision guidelines

19/04/2018  
C125(Part 1)

The following decision guidelines apply to an application for a permit under clause 32.07, in addition to those specified in clause 32.07 and elsewhere in the scheme:

- Whether the development contains elements of the 'garden city' character. Specifically, whether the proposal:
  - Includes well located open space, primarily unencumbered by easements, to provide for large tree planting and a mixture of indigenous and exotic vegetation in front, side and rear setbacks.
  - Provides vegetation in the front setback that softens the appearance of built form and contributes to the public realm.
  - Sites buildings to minimise the need to remove of significant trees, and protects significant trees on the site and adjoining properties.
  - Maximises planting opportunities adjacent to the street by excluding hard paving such as car parking, turning circles and wide driveways, and minimising basement car parking, within the front setback.

- Minimises hard paving throughout the site including limiting driveway lengths and widths, providing landscaping on both sides of driveways, and restricting the extent of paving within open space areas.
- Where vehicle crossovers are located and whether they are minimised in number to prevent traffic disruption, and preserve nature strips and street trees.
- Include significant breaks and recesses in building massing, is designed to avoid large block like structures dominating the streetscape.
- Whether the development uses robust and low maintenance materials and finishes that complement the neighbourhood, withstand weathering and create minimal adverse impacts (for instance, safe walking surfaces and limited reflective materials).
- Whether the development minimises the impact to neighbouring properties, through suitable setbacks from adjacent secluded private open space to enable the provision of screening trees, and scaling down of building form to the adjoining properties in the General Residential Zone, where applicable.
- Where the dimensions of an irregular shaped or corner lot make it difficult to meet side and rear setback standards, variation to these standards will be considered where the development proposal demonstrates that it contributes to 'garden city' character. Specifically, whether the variation or reduction in setback allows the development to:
  - Provide sufficient and well located open space elsewhere on the site, primarily unencumbered by easements, to provide for large trees to be retained or planted within front, side and rear setbacks, and secluded open space areas.
  - Retain or plant vegetation in the front setback that softens the appearance of built form and contributes to the public realm.
  - Minimise the impact to neighbouring properties, through suitable setbacks from adjacent secluded private open space to enable the provision of screening trees, and scaling down of building form to the adjoining properties.
  - Establish setbacks that are appropriate taking into account the shape of the lot and the setbacks of adjoining properties.
